Product Data Sheet

SUNCOAT SUPERTAK & SUPERTAK EXTRA FLASHCURE ADHESIVES

Product code: YA108/YA109 Pack size: 600 ml.

Suncoat Supertak/Supertak Extra is a specially formulated aerosol adhesive for holding garments or fabric pieces securely in place on a screen printing base during the printing operation. The garment will be fixed securely throughout a multi-colour printing operation for accurate register but can easily be removed from the screen printing base without damage or distortion of the printed image. Suncoat Supertak may also be used as a general purpose adhesive in the studio or preparation department, for mounting showcards, paper or photographic prints. Suncoat Supertak Extra is particularly suited for flash curing applications.

INSTRUCTIONS FOR USE

Shake the aerosol well before use. Spray Suncoat Supertak/Supertak Extra adhesive onto the printing base from a distance of approximately 12 inches using a wide, even spray pattern. Ensure that an even coating is applied wherever the garment or panel is to be placed. Suncoat Supertak/Supertak Extra should not be used on vacuum printing beds.

WASHING UP

Suncoat Supertak/Supertak Extra is readily removed from the printing base with Suncoat Universal Screenwash (YC1100)

STORAGE

In order to keep the spray nozzles clear, the containers should be stored upside down when not in use.

SAFETY AND HANDLING

Suncoat Supertak/Supertak Extra is supplied in a pressurised container which must be protected from sunlight and must not be exposed to temperatures exceeding 500°C. Do not pierce or burn the can, even after use. Do not spray onto a naked flame or any incandescent material. Suncoat Supertak/Supertak Extra is free of CFC gases.

Detailed Health and Safety Data is available on request from your local Sun Chemical Screen branch.

This information has been carefully compiled from experience gained in the laboratory and under commercial conditions. However, the product's performance and its suitability for the customer's purpose depend on the particular conditions of use and the material being printed. We recommend that customers satisfy themselves that each product meets their requirements in all respects before commencing a print run. Since we cannot anticipate or control the conditions under which our products are used it is not possible to guarantee their performance. All sales are subject to our standard terms and conditions of sale.

We would point out that the information contained in this leaflet is only a recommendation and may need to be altered to suit the conditions and efficiency of the equipment employed. Sun Chemical Screen products are not designed for use in conjunction with those of any other ink maker or similar supplier unless agreed in writing.
